

ENVIRONMENTAL AND WASTE MANAGEMENT POLICY

Hender Lee Electrical & Instrumentation Contractors Pty Ltd recognises the principle of sustainable development and through the commitment and involvement of management and employees' is dedicated to the provision of an environmentally responsible service to its customers, workforce and the community.

Key environmental policy objectives are:

1. To conduct all operations in accordance with appropriate legislation.
2. To establish environmental objectives and incorporate environmental management practices in project planning.
3. To provide staff training to improve awareness and knowledge of environmental issues.
4. To identify responsibilities and allocation of resources to implement these policy objectives.
5. To communicate constructively with customers, workforce and the community on the environmental effects of proposed project operations.
6. To apply the requirements and framework of ISO 14001 for Environmental Management Systems.

Hender Lee Electrical & Instrumentation Contractors supports environmentally sustainable practices including conservation of resources, waste reduction, emission control, protection of ecosystems and energy efficiency consistent with current technical knowledge.

A handwritten signature in black ink, appearing to read 'Allan Hender', written over a light blue rectangular background.
